Columbia University's need for additional space for scientific instruction and research facilities continues to increase. To help alleviate this need for space and to better meet the scientific challenges of the 21st century, the University is constructing a new science building on the northwest corner of its Morningside campus. The project is located at the corner of Broadway and West 120th Street above the Dodge Physical Fitness Center.

**Construction Activities for the Weeks of February 8, 2010 and February 15, 2010**

**Week of February 8, 2010**
- Mechanical, Electrical, Plumbing (MEP) rough-in work continues throughout building.
- Carpentry and duct layout for the building’s base and on lab floors will take place.
- Curtain wall installation will occur at the 400 level (plaza)’s west and east walls.
- Exterior masonry work will begin. Scaffolding within site limits will be in place until April 10.
- Work on the Chandler and Pupin bridges as well as removal of the exterior hoist is in progress.

**Week of February 15, 2010**
- MEP rough-in work will occur throughout building.
- Carpentry and duct layout will continue in the building’s base and on lab floors.
- Curtain wall installation at the 400 level’s west and east walls will be in progress.
- Removal of construction hoist will continue.
- Elevator work continues. Two construction cars are now running.
- Roofing work (on main roof) will take place.
- A new air handling unit will continue to provide heat to the building.
- A new exit stairway at the south end of building continues to be developed.
- Start-up of additional air handling units will be in progress.

**General Notes**
- Work hours are between 7:00 a.m. and 3:00 p.m., unless otherwise noted.
- Dodge Fitness Center and Levien Gymnasium are open for business.
