Columbia University’s need for additional space for scientific instruction and research facilities continues to increase. To help alleviate this need for space and to better meet the scientific challenges of the 21st century, the University is constructing a new science building on the northwest corner of its Morningside campus. The project is located at the corner of Broadway and West 120th Street above the Dodge Physical Fitness Center.

Construction Activities for the Weeks of

May 3, 2010 and May 10, 2010

Week of May 3, 2010

• A crane will be located at 120th Street on Friday, April 30, 2010. The crane will assist in the delivery of the last stair to be placed in the building’s 400 to 600 levels.
• Interconnections for the bridge between Chandler and Pupin continue.
• The finalizing of work on mechanical, electrical, plumbing (MEP) and air handling units (AHUs) continues.
• Carpentry and duct layout for the building’s base and on lab floors will take place.
• Curtain wall installation at the 400 level plaza’s west and east walls nears completion.
• New library subfloors are installed and are nearing completion.

Week of May 10, 2010

• Coordination and work continues on the hot tar roof over the bridge connected to Pupin’s 1200 level.
• Work on the Chandler and Pupin bridges continues.
• Exterior masonry work begins. Scaffolding within site limits will be in place.
• The finalizing of work on MEP and AHUs continues throughout building. Additional AHUs are scheduled to be brought online.
• Carpentry and duct layout continues in the building’s base and on lab floors.
• Curtain wall installation at the 400 level’s west and east walls nears completion.

General Notes

• Work hours are between 7:00 a.m. and 3:00 p.m., unless otherwise noted.
• Dodge Fitness Center and Levien Gymnasium are open for business.
