Columbia University is creating a Core Research Computing Facility to enhance energy to the current main data center. This project will also create additional space in the data center by substituting a large unit Uninterruptable Power Supply (UPS) for all the individual UPS's now taking up space in each rack. The UPS will sit in a purpose-built box that will hang from the underside of the plaza bridge that crosses the Grove between the gym, Uris Hall and Havemeyer Extension.

Construction Activities for the Week of May 13, 2013

Please note:

- Construction is nearing completion. This will be the last regular construction update. Thank you for your patience and support throughout this project.

What to Expect

- Minor activity on site
