Columbia University is creating a Core Research Computing Facility to enhance energy to the current main data center. This project will also create additional space in the data center by substituting a large unit Uninterruptable Power Supply (UPS) for all the individual UPS's now taking up space in each rack. The UPS will sit in a purpose-built box that will hang from the underside of the plaza bridge that crosses the Grove between the gym, Uris Hall and Havemeyer Extension.

What is Happening

- Selective site and interior demolition and concrete chipping work
- Material and equipment deliveries
- Mechanical Electrical and Plumbing (MEP) existing conditions survey and layout

What to Expect

- Regular work hours: 7:00 a.m. - 4:00 p.m. Monday-Friday
  - Possible weekend work depending on site conditions
- Pupin Pedestrian Bridge closure
- Loading dock access drive closure
- Pedestrians detours
- Access driveway utilization and construction staging
- Noise from small tools and equipment
- Temporary pedestrian bridge site perimeter protection and fencing adjustments

-Please note that all activities are subject to change based on weather and other field conditions-
