Colombia University is creating a Core Research Computing Facility to enhance energy to the current main data center. This project will also create additional space in the data center by substituting a large unit Uninterruptable Power Supply (UPS) for all the individual UPS's now taking up space in each rack. The UPS will sit in a purpose-built box that will hang from the underside of the plaza bridge that crosses the Grove between the gym, Uris Hall and Havemeyer Extension.

**Construction Activities for the Weeks of:**

**April 16, 2012 and April 23, 2012**

**What is Happening**

- Construction activity is scheduled to begin the week of April 16, 2012
