This construction update has been developed specifically for occupants of the Northwest Corner Building and contains information on construction activities at the 10th, 11th and 14th floors. This project will create research space for the School of Engineering and Applied Science (SEAS), Mind Brain Behavior Institute (MBBI), and the Department of Physics. The space will include new wet and dry lab space for the Institute for Data Sciences and Engineering (IDSE), a Condensed Matter Physics Initiative, flexible research labs, faculty offices, and doctoral student workstations. We hope you find this useful. Thank you for your patience and cooperation.

Construction Activities for the Weeks of:
March 17, 2014 and March 24, 2014

What is happening

- Delivery and removal of materials
- Carpentry work
- Mechanical, electric, and plumbing (MEP) and structural work ongoing
