Columbia University is creating a Core Research Computing Facility to enhance energy to the current main data center. This project will also create additional space in the data center by substituting a large unit Uninterruptable Power Supply (UPS) for all the individual UPS's now taking up space in each rack. The UPS will sit in a purpose-built box that will hang from the underside of the plaza bridge that crosses the Grove between the gym, Uris Hall and Havemeyer Extension.

What is Happening
- Selective site and interior demolition and concrete chipping work
- Material and equipment deliveries
- Mechanical Electrical and Plumbing (MEP) existing conditions survey and layout
- Concrete on metal decking installation

What to Expect
- Regular work hours: 7:00 a.m. - 4:00 p.m. Monday-Friday
  - Possible weekend work depending on site conditions
- Loading dock access drive closure
- Pedestrian detours
- Adjustments to temporary site barriers and fencing
- Access driveway utilization and construction staging
- Noise from small tools and equipment

*Please note that all activities are subject to change based on weather and other field conditions*
