The Housing Application and Role of the Schools

Each school is allocated a number of spaces. To receive a housing assignment, you must first be approved for a housing allocation by your school. The Housing Liaison for your school or department can provide information on the housing approval process. This information is typically available in admissions packets as well. All other inquiries regarding housing assignments, policies, and procedures should be addressed to UAH directly.

For fall, the application approval process begins in mid April and concludes mid July. For spring, approvals begin mid November and conclude by the beginning of January.

Please keep in mind that each school has its own deadline by which you must apply for housing in order to be considered for a housing allocation.

Students placed on the Wait List should follow the instructions outlined on [this page](#).
